

UPF3A/UPF3B by stage — groups from the supplementary contrast table
only testis libraries belong to that contrast, so every other panel is ungrouped

● Juvenile (contrast table)
 ● Adult (contrast table)
 ● ungrouped
 --- Birth
 --- Onset meiosis, oogenesis
 --- Onset meiosis, spermatogenesis

log2(UPF3A / UPF3B), relative to the earliest stage of that tissue

Ordinal developmental stage (within-species percent rank)
